

## **Its Fall Harvest Time**

It is that time of year where this season's crop is being harvested in the fields. The gravel as well as the paved roads will have numerous large slow moving farm equipment on them from the early day time hours and sometimes into the night. Please use extra care when traveling this fall harvest season. Drivers should be extra careful and not travel in the blind spot of farming equipment. Extra care should be used when passing farm equipment, be sure that the person on the farm equipment is aware that you are behind them so that they do not suddenly turn into your path. Most of all please be patient with the slow moving equipment because they are helping to provide the food we all need.

If we follow simple common sense rules we will all have safer travel during this harvest season.
